GD

“Gottfried Dildei was truly revolutionary in the Schutzhund/IGP world and in dog training, period. The first trainer to use food in training, the use of a fence to build more barrier frustration along with giving the dog more security to develop a dog in protection, the first person I know of to talk about the importance of a dog's emotional state in protection training, the frontal bite exercise in protection, etc. A genius. I have a huge amount of respect for him as a dog trainer. I was able to attend a few of his seminars but, unfortunately, never personally trained with him or got to know him. May he rest in peace. - Greg Doud

“I am amazed that there have been no tributes here, although there have been some on Facebook and maybe that is how people nowadays pay tribute. Anyway, I only met Gottfried once at his seminar, but much of what I learned about dogs and dog training were from his videos and his ideas. He was one of the great pioneers of dog training and I am indebted to him for all of his great work. RIP Gottfried.
