“ To me you're more than just my dad. You lit up every room u walked into and made every situation seem manageable. The past three months u lived with me on your journey will hold a special place in my heart for the rest of my life. It's not just me tho Octavia and Kalel loved waking up every morning and seeing you and strong arming u out of ur snacks. Mike also truly loved having u around and getting to grow the bond u guys shared. I miss you more than u can ever know and each second you're not here my heart breaks a little more, but I know how painful the past month was for u and I'm glad u found peace while I sang to u and held u. I love you dad.
