MC

“ In the last few years of my father's life I had to watch him decline from Dementia. In that time I tried to take care of him and do the best I could for him. From living in Connecticut handling matters for him and until I moved in with him in Florida we both made the very best of whatever time we could. Morning walks, lunches, dinners, going into town, shopping, beach, family gathering, but most of all selfie picture taking lol. I'm so happy he and I shared that time and moment with a push of a button to capture us together. From the beginning my father and mother cherished having a child and I was a chosen one. Both of my parents loved me dearly and did what they could for me, and I am truly grateful for that. There has been many a good time and memories that I am able to recall and look back on growing up. I'm also grateful for having all of these wonderful pictures of my parents when they were young, dating, and even when my father served in the Army for the Korean War. Thank you Dad for your service and help to protect our country USA. I know you are home now and with mom in the Kingdom of God. Kiss her for me and tell her I miss her and love her. Both of you will forever be in my heart always! Your loving son Michael
